

# Deliver Predictable Infrastructure Results

We're here to help you make sense of the data that your systems produce. Whether you want to use your infrastructure in the cloud or have services on-premises, SVA Software provides tested processes, services at scale, and IT support to meet your infrastructure's needs.

SVA Software, acting as an extension of your team, offers best-in-class technology and personalized support while providing flexible management of your systems.

## Why SVA Software?

SVA Software, Inc. is a 100% subsidiary of SVA System Vertrieb Alexander GmbH, a German company. SVA GmbH is the largest privately owned systems integrator in Europe with 2,500 employees and a revenue of more than \$1.4B (2021) servicing over 3,000 customers worldwide.

SVA Software, Inc. was founded in 2016 selling SVA GmbH developed solutions to North America. SVA Software's solutions enable your IT investments to meet future business needs through infrastructure transformation providing greater flexibility, agility, security and expertise.

We raise the bar with a full suite of IT solutions to fit your specific operating needs, now or as your business grows.

## 5 Reasons Why Leading Companies Choose SVA Software, Inc.

### Real-World Solutions

With more than 25 years of experience in IT infrastructure, our solutions were developed to address real-world technical challenges.

### Technical Expertise

Our technical team is not only large in size, but also in technical expertise, with the highest technical certifications in the industry.

### Trusted Partner

We strive for long-lasting partnerships that enable our partners to scale their IT infrastructure together.

### Customer Focused

Our main principle is to give our customers the best possible support with flexibility to make recommendations immediately.

### Support Services

SVA Software and SVA GmbH have a combined team of over 400 engineers working together to provide around-the-clock service.

## Our Partners

# Our Portfolio

## BVQ<sup>o</sup>

BVQ is a cross-platform monitoring, reporting, alerting, and analysis system for a complete IT infrastructure that intelligently integrates with ITSM systems and visualizes your infrastructure from end to end.

## IDR<sup>+</sup>

The Integrative Disaster Recovery (IDR) manager is an automated and interactive run book solution that allows users to quickly access assigned recovery tasks during downtime or in the event of a disaster.

## GET VM<sup>+</sup>

GetVMware can help you in planning and negotiation by evaluating your environment's license data sets to detect ELA compliance violations, as well as providing you with an overview of your license usage, optimization and consolidation recommendations, and audits.

## LIBERYSE<sup>™</sup>

Liberyse is a comprehensive compliance solution that combines, manages, and stores data from a wide range of source systems in an audit-proof archive with intelligent research functions that are subject to retention requirements.

## TAPE<sup>✓</sup> AUDIT

To assist you with the auditing process, Tape Audit integrates with IBM Spectrum Protect. Tape Audit automates the execution of backup and archive data audits and helps ensure that data on off-line media is readable when needed.

## OPTIMIZATION PLATFORM

zOptimization Platform is a three-tiered Mainframe solution. Our zServices team helps you with Systems Performance, Capacity Planning and to fully leverage different pricing models. Cloud based zWorkload Reporter includes 700+ reports to assist you with your performance analysis. zGuard is a real-time monitor that includes intelligent automation ideal for centralized operations.

# Our Partner Network

We team up with outstanding technology providers to deliver a comprehensive solution for improvements around your corporate IT infrastructure.

## ARPIO

Arpio safeguards your entire AWS environment against disaster. Arpio automates cross-region and cross-account fail over in minutes, ensuring that your business can withstand any cloud outage or ransomware attack.

## beta<sup>systems</sup>

beta doc|z is a comprehensive software solution for managing, storing and providing bulk document data on the mainframe. You can centrally archive documents in an audit-compliant manner and provide them online at little cost.

## KUBERMATIC

Kubermatic's multi-cloud Kubernetes platform supports multi-cluster management. Kubermatic is a complete software solution for teams running containerized workloads in hybrid-cloud, multi-cloud, and edge environments.

## NEXTRON SYSTEMS

Nextron Systems offers the most sophisticated and flexible compromise assessment tool on the market, in addition to the best compromise scanner and management platforms to facilitate ongoing monitoring.

## ORCHARHINO

orcharhino is a full-service data center management platform. Automate Linux and Windows deployments, configuration management, lifecycle management, and patch management. Use orcharhino for your cloud or on-premises data center or IoT devices.

## Runecast

Runecast is a patented enterprise platform that enables IT Security and Operations teams to be proactive by providing automated vulnerability scanning, security compliance audits, and remediation capabilities in your AWS, Azure, GCP, Kubernetes, VMware, Windows, and Linux environments.

## UNCOVER PROBLEMS

Automate system compliance, best practices, and security standards, as well as reporting across your entire IT infrastructure.

## PRIORITIZE ACTIONS

Control your system configurations proactively, plan your next upgrade or IT modernization, and take decisive action.

## DISCOVER SAVINGS

Get immediate ROI and time savings by gaining in-depth insights into your systems in order to negotiate your next ELA.

## MEASURE RESULTS

Define your IT transformation journey to achieve scalable, secure, and resilient adoption of new technologies.
