

STREAMLINE YOUR IT INFRASTRUCTURE

The **ultimate duo** for reducing infrastructure complexity and maximizing stability.

Run your IT infrastructure optimally and securely through **reduced complexity, gained visibility, and secure IT workloads** anywhere, on-premise, or in the cloud.

Stability & security for your data center server infrastructure

- **Standardize the data center** hosts via automated deployment of hosts instances, on premises, and in the cloud
- **Automation** of the data center lifecycle
- **Release & patch management** to control content and to remediate vulnerabilities

The cockpit of your data center infrastructure

- Visibility and status of **data center health, performance level and capacity**
- Enables IT teams to make decisions to **stabilize the Compute, Storage and/or SAN environment**
- Insight into your IT infrastructure in a **clear and logical end-to-end view**
- Facilitates the **connection to ITSM, reporting, and BI solutions**

Unlock the **full potential** of your IT infrastructure with BVQ and orcharhino.

Complete solution for managing and optimizing data center infrastructure. Stay ahead of the curve and ensure that your IT infrastructure is agile.

The **ultimate duo** that helps **data center architects** do their job.

Empower your IT infrastructure with our advanced features that help you:

- ✓ Improve **storage performance**
- ✓ Simplify **infrastructure management**
- ✓ Automate **provisioning and configuration management**
- ✓ Optimize **capacity utilization**
- ✓ Enhance **team collaboration and communication**
- ✓ Achieve significant **cost savings and ROI**

Six important reasons why **data center architects** should start using BVQ and orcharhino:

End-to-end analytics via integration of multi-layers

BVQ enables you to **perform automated multi-layer analyses** and pinpoint whether the areas of **Computing, Storage, SAN or Kubernetes** are causing any issues and how these affect the other layers.

Real-time monitoring and alerting

BVQ provides **early warning detection through proconfigured alerts** in the event of performance degradation and issues. View interactive charts that display the affected components and **receive recommendations** on how to solve these issues.

API ready Connectivity to BI & ITSM

BVQ offers a REST interface to feed data from BVQ into your business processes. Integrate with ServiceNow® to help automate **incident ticket creation**.

Simplified Data Center Lifecycle Management

orcharhino simplifies data center management by offering a **single user friendly interface for virtualization, containers, and bare-metal servers**. This feature is designed to help save time and minimize the risk of errors.

Automated Provisioning & Configuration Management

orcharhino facilitates the **deployment and management of software packages, configurations, and updates**. Enhance overall efficiency while mitigating the likelihood of errors and ensuring consistency.

Improved Security & Compliance

orcharhino provides security & compliance features to **manage access control, monitor activity, and ensure compliance with industry regulations**. Minimize the risk of security breaches and protect sensitive data.
